New Technology to Explore

On 4/29, The following topic was discussed;

"I'd also like to start devoting a segment each month to exploring some new technology (Progressive Web Apps, Accelerated Mobile Pages, maybe newer developments since them; security and assistive issues; etc.)"

It was decided to collect the technologies that the TSSG Web team member would like to pursue as comments to this page. If don't feel comfortable placing a comment here then feel free to send a brief discussion to Jim "Drew" @ jim.drewniak@comcast.net (Drew volunteered to update this page for members who don't want to edit directly)
