

# 2019-06-03 Web Meeting notes

## Date

05 Jun 2019

## Attendees

- [Joel Sharasheff](#)
- [Jim Drewniak](#)
- [Jim Turner](#)
- [Ralph A. Navarro Jr.](#)
- Tyler, Paul, Peggy Ostlund

Drew - will be working for Amazon/Whole Foods as a part-time, personal shopper

Ralph - We want to report on multiple results per ticket.

Need to fix a bug where only the last item of a test series is updating to Jira.

He cleaned up the gradle build file that had deprecated calls.

He also cleaned up our narrow screen geb and spock tests by creating a hamburgermenu module.

Paul - he's been coding the authentication piece of his angular, express, node.js, mongodb scheduling web site.

keepass and <https://pwsafe.org> are useful password saving apps.

<https://pixabay.com/vectors/search/website%20design/>

From this url, we might be able to find a good replacement for the Web Team background photo that is displayed in the tssgTechWebflowMultipage url .

We created in Jenkins a deployment for a tssgTechWebflowMultipage with background photo's from Thomas and his code in the webflowlike\_multipage branch.

Does anyone want to continue with Drupal development?

Drupal - onboarding card needs to be brought up-to-date

<https://store.technologynursery.org> contains drupal display of tssg default theme (older)

<https://tssg.technologynursery.org> contains drupal display of tssg with another theme.

**Do we want to add modules to Drupal to develop new versions of our web site?**

Learn by using drupal?

### Next Sprint?

Jim mentioned setting up a web site prettification sprint.

Considering these tasks...

make navbar leaner?

1. web site with graphic background (merge current with Thomas' stuff)
2. apply Paul's storing schedule code to the site with mongodb
3. modify code to auto-update the site schedule from data stored in mongodb
4. continue drupal investigation ?
